

Logistics & Distribution

Integrated security management solution for the logistics & distribution industry

- Do you have a need to cover large areas of floor space in low light conditions with video surveillance that is actually useful?
- Do you have certain key high risk areas in your distribution channels where HD quality video surveillance will be valuable?
- Do theft or losses sometimes go undetected or unresolved even after thorough investigations?
- Would you like to have detailed evidence of how damages occur or how it was covered up?
- Could health and safety incidents bring your operations to a standstill until cleared by officials?
- Would you like to have eye on your workforce and their operational efficiency?
- How about advanced search capabilities to find scene changes, missing objects, and events in the shortest possible time?
- Would you like to manage driver and delivery truck access to site, as well as gain intelligence on turn around and times on site?

With an ISMS solution this is entirely possible! FS-Systems can cover your entire operation and give you the business intelligence you need, including the integration of:

- | | |
|-----------------------|------------------------------|
| • Video Surveillance | • Random Search & Selection |
| • Access Control | • Alcohol & Drug Testing |
| • Fire Detection | • Vehicle & Truck Management |
| • Perimeter Detection | • Visitor Management |
| • Key Management | • Time & Attendance |

About Us

FS-Systems, founded in 1971, is a leading African systems integrator providing end-to-end fire and electronic security solutions, protecting lives and assets through technology. We are specialists in the Design, Supply, Installation and Maintenance of:

Success Story

FS-Systems has successfully completed Video Surveillance, Access Control, Fencing and Fire integrations for Cilmor Distribution Centre. The Shoprite Group's new Cilmor distribution centre in Brackenfell, Cape Town, spans 123 000m² and is described by the group as one of the most technologically advanced distribution centres on the African continent. It consolidates the activities of five different distribution centres spread throughout Cape Town. The distribution centre consists of three different sections, namely ambient (operational since August 2017), frozen and chilled (both operational in 2018).
