

Rhombus Systems delivers an enterprise-grade, cloud-based physical security platform that is modern and easy-to-use. Rhombus merges intelligent security cameras, integrated IoT sensors, and a straightforward user-interface to provide greater control when managing physical security across multiple locations.

Upgrading to Rhombus helps organizations streamline operations, improve visibility, and reduce IT costs without sacrificing performance.

Simple Deployment

- Plug-and-play - single cable installation via PoE
- No DVR/NVRs, servers, or hard drives required
- Register cameras in as little as 5 minutes

Centralized Cloud Management

- Manage thousands of cameras across all locations
- 24/7 remote access from any device
- 0 Kbps bandwidth consumption over LAN

Smart Security Cameras

- 20-180 days local storage and optional cloud storage
- End-to-end encryption and automatic updates
- Video latency as low as 200 ms - lowest in the industry

Integrated IoT Sensors

- Monitor asset location, entry point, and environment
- Acquire real-time sensor data paired with video evidence
- Connects automatically - no manual configuration

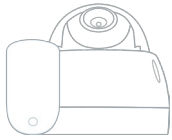

Open Platform

- Integrate with over 20 leading enterprise solutions
- Open API and integrations for enhanced capabilities
- Always open - have the ability to work with future apps

Intuitive Interface

- No training required - get started in minutes
- Receive real-time alerts for faces, vehicles, and more
- Advanced AI features at no additional cost

How It Works

Connect over Wi-Fi/ethernet and pair the sensors to capture video and sensor data

Cloud infrastructure delivers real-time streaming, zero bandwidth consumption, and monitors your environment

Remotely manage your video security and sensors from any browser or mobile device

Set custom policies and receive alerts if particular events are detected

Modern capabilities in the palm of your hand

- Register cameras effortlessly
- Access all cameras and locations from any device
- Watch real-time video feeds and review footage with a simple swipe
- Monitor multiple locations at once with video walls
- Receive alerts via push notifications
